

*Wylie Burke M.D., Ph.D.*

---

Dr. Burke is Professor and Chair of the Department of Medical History and Ethics at the University of Washington and Adjunct Professor of Medicine and Epidemiology. She received a PhD in Genetics and an MD from the University of Washington, and completed residency training in internal medicine. Her research addresses the ethical and policy implications of genetic information in medicine and public health. She served as the founding Director of the University of Washington's Women's Health Care Center from 1994 to 1999 and was a Visiting Scientist at the Center For Disease Control's National Center for Chronic Disease Prevention and Health Promotion in 1998. Dr. Burke currently serves on the National Advisory Council for Human Genome Research.
